CUKUROVA GENERATOR SYSTEMS

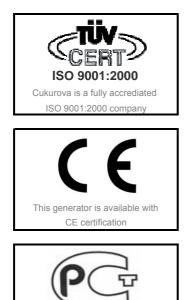

1500 Rpm, 50Hz, 400V

CJ150VL

Volvo TAD532GE diesel engine

Leroy Somer LSA 44.2 S75 alternator

Cukurova is accrediated with Gost certification

Standard Generator Features AMF, Automatic mains failure unit

- Heavy duty type, 4 cylinder, water cooled engine
- ♦ 60°C tropical type radiator
- Starter motor
- Lead acid battery
- Charging alternator
- Battery charge redressor
- Heavy duty, brushless type alternator
- ♦ Base frame with anti-vibration units
- Industrial type silencers
- Flexible exhaust compensator
- Block water heater unit
- Control panel with digital-automatic main control module
- Fan, fan drive, charging alternator drive and all rotating parts covered
- Radiator matrix covered by metal mesh against the mechanical damages
- Fabricated and welded steel base frame
- Anti-vibration mountings
- Engine and alternator manufacturer test reports
- Factory load, performance and function tests

Optional Features

- Automatic load transfer panel
- Automatic syncronization and power sharing systems
- Soundproof canopy
- Container type enclosers
- ♦ Road trailer
- ♦ Job-site trailer
- Protection circuit breaker
- Air start
- Remote type radiator
- Base fuel tank
- External type fuel tank
- Automatic fuel transfer system
- Residential silencer

APPLICATION DATA

Volvo TAD532GE Engine

Standard Features

The TAD532GE is a powerful, reliable and economical Generating Set diesel

Durability & low noise levels

Designed for easiest, fastest and most economical installation. Well-balanced to produce smooth and vibration-free operation with low noise level.

Low exhaust emission levels

The state of the art, high-tech injection and charging system with low internal losses contributes to excellent combustion and low fuel consumption. The TAD532GE is certified for EU Stage2 exhaust emission regulations.

Easy service & maintenance

Easily accessible service and maintenance points contribute to the ease of service of the engine.

Technical Description

*Optimized cast iron cylinder block with optimum distribution of forces

- $\diamond \mbox{Piston}$ cooling for low piston temperature and reduced ring temperature
- Drop forged connection rods
- Crankshaft hardened bearing surfaces and fillets for moderate load on main output bigend bearings
- Keystone top compression rings for long service life
- Replaceble valve guides and valve seats
- Three PTO positions at flywheel end
- ♦Lift eyelets

Standby kW Prime kW Model Gross Gross Net Net TAD532GE 129 125 116 112

Cooling System

Fuel System

- Type of injection system Fuel injection pump
- Total Fuel flow, Liter/h
- Governor type
- Six hole fuel injection nozzles
- Direct injection unit pumps

Features

- Governor with can-bus communication
- Compact design
- High power to weight ratio
- Emissions compliant
- Noise optimized engine design

Technical Specifications

Manufacturer	VOLVO
Model	TAD532GE
Туре	4 cycle, water-cooled, diesel engine
Number of cylinders	4
Cylinder arrangement	In-line
Displacement, Liters	4.76
Bore X Stroke, mm	108 X 130
Compression Ratio	17.5:1
Combustion System	Direct injection
Aspiration	Turbocharged, air-to-air intercooled
Rotation	Anti-clockwise viewed towards flywheel
Gross engine power, kWb	129
Fan Power, kWm	4
BMEP gross, Mpa	1,5
Exhaust gas temp.(after turbo), °C	540
Exhaust gas flow (after turbo),m ³ / min	16,3

Fuel Consumption

grams per kWh		

Bosh single injection pump 360 Heinzmann EDC4

Direct injection

*Washable fuel prefilter with water seperator

- Rotary low pressure fuel pump
- Fine fuel filter of disposible type

grams per kWh	%100 Load	216 g/kWh
	%75 Load	209 g/kWh

Electrical System

Alternator Starter motor (DC) Starter motor power Bosh, 12 Volt, 55Amp Bosh / EV 3.1 kW

Leroy Somer LSA 44.2 S75 Alternator

Standard Features

Top of the Range	Electrical	Performance
------------------	------------	-------------

Class H insulation Standard 12-wire re-connectable winding, 2/3 pitch High efficiency and motor starting capacity R 791 interference suppression conforming to standard EN 55011 group 1 class B standard for Europen zone (CE marking)

Protection System Suited to the Environment

The LSA 44.2 is IP23

Reinforced Mechanical Structure Using Finite Element Modelling

Compact and rigid assembly to better withstand generator-set vibrations Steel frame

Cast iron flanges and shields

Twin-bearing and single bearing versions designed to be suitable for engines on the market

Half-key balancing

Greased for life bearings (regreasable bearings optional)

Accessible Terminal Box Proportioned for Optional Equipment

Easy access to the voltage regulator and to the connections Possible clusion of accessories for paralelling, protection and measurement 8 way terminal block for reconnecting voltage reconnection

Compliant with International Standards

The LSA 44.2 alternator conforms to the main international standards and regulations:

IEC 60034, NEMA MG 1.22, ISO 8528, CSA, CSA/UL

It can be integrated into a **CE** marked generator set The LSA 44.2 is designed, manufactured and marketed in an ISO 9001 environment

Control Panel

Standard Equipments

Datakom DKG307 digital automatic control module Hourmeter

Emergency stop button

Datakom DKG307 Control Module Description

The DKG-307 is a comprehensive AMF unit for a single generating set operating in standby mode.

In AUTOMATIC position, DKG-307 monitors mains phase voltages and controls the automatic starting, stopping and load transfer of the generating set in case of a mains failure and once the generator is running, it monitors internal protections and external fault inputs. If a fault condition occurs, the unit shuts down the engine automatically and indicates the failure source with the corresponding red led lamp.

The DKG-307 provides a comprehensive set of digitally adjustable timers, threshold levels, input and output configurations and operating sequences. The unauthorized access to program parameters is prevented by the program lock input.All programs may be modified via front panel pushbuttons, and do not require an external unit.

*The fault conditions are considered in 2 categories as Warnings and Alarms. Measured values have separate programmable limits for warning and alarm conditions

*The service request indicator lamp turns on at the expiration of either engine hours or time limits

It is possible to monitor the operation of the system locally or remotely with the WINDOWS based PC utility program.

*The unit is designed for front panel mounting. It is fitted into the cut-out with the steel spring removed. Connections are made with 2 part plug and socket connectors.

Pushbutton Controls

Model Codes and General Information

Information Power Ratings

Standby power rating is for the supply of emergency power at variable load for the duration of the non-avalaibality of the mains power supply.No overload capacity is available at this rating.A standby rated engine should be sized for an avarage load factor of 80% based on published standby rating for 500 operating hours per year.Standby ratings should never be applied except in true emergency power failure conditions.

Prime power rating is available for unlimited hours per year with a variable load of which the average engine load factor is 80% of the published power rating, incorporation of a 10% overload for 1 hour in every 12 hours of operation which permitted

Continuous power rating is available for continuous full load operation.No overload is permitted.

Acc. to ISO 3046/1, BS 5514, DIN6271
