

Perkins 403C-15G diesel engine

Newage/Stamford BCI164C alternator

**Standard Generator Features**

- ◊ AMF, Automatic mains failure unit
- ◊ Heavy duty type, 3 cylinder, water cooled engine
- ◊ 50°C tropical type radiator
- ◊ Starter motor
- ◊ Lead acid battery
- ◊ Charging alternator
- ◊ Battery charge redressor
- ◊ Heavy duty, brushless type alternator
- ◊ Base frame with anti-vibration units
- ◊ Industrial type silencers
- ◊ Flexible exhaust compensator
- ◊ Block water heater unit
- ◊ Control panel with digital-automatic main control module
- ◊ Fan, fan drive, charging alternator drive and all rotating parts covered
- ◊ Radiator matrix covered by metal mesh against the mechanical damages
- ◊ Fabricated and welded steel base frame
- ◊ Anti-vibration mountings
- ◊ Engine and alternator manufacturer test reports
- ◊ Factory load, performance and function tests

**Optional Features**

- ◊ Automatic load transfer panel
- ◊ Automatic synchronization and power sharing systems
- ◊ Soundproof canopy
- ◊ Container type enclosures
- ◊ Road trailer
- ◊ Job-site trailer
- ◊ Protection circuit breaker
- ◊ Air start
- ◊ Remote type radiator
- ◊ Base fuel tank
- ◊ External type fuel tank
- ◊ Automatic fuel transfer system
- ◊ Residential silencer

**APPLICATION DATA**

**Perkins 403C-15G Engine**

**Standard Features**

**Compact, efficient power**

◊A class-leading engine package coupled with an innovative, newly designed cooling pack provides optimum power density, making installation and transportation easier and cheaper.  
 ◊This package has been specially designed to hit the key power nodes required by the power generation industry.

**Quiet, clean power**

◊The 403C-15G has an exceptionally low noise signature making it the ideal choice for power generation in any environment.  
 ◊A high compression ratio also ensures clean rapid starting in all conditions.  
 ◊Design features ensure maximum cleanliness in terms of emissions throughout the engines operating life.

**Reliable power**

◊Developed and tested using the latest engineering techniques this engine reliably provides power when you need it.  
 ◊Excellent service access further improves maintenance and support is provided by a worldwide network of 4000 distributors and dealers.

**Standards**

◊ UK MOD, BS5750, ISO9001, BS5514/1-1982, ISO 3046/1, ISO 8528/1

Model	Standby kW		Prime kW	
	Gross	Net	Gross	Net
<b>403C-15G</b>	<b>13,5</b>	<b>13,3</b>	<b>12,2</b>	<b>12,0</b>

**Lubricating System**

Type Pressurized  
 Capacity, Liters 6  
 Lub oil pressure (min), kPa 262-359  
 ◊Wet steel sump with filler and dipstick  
 ◊Spin-on full-flow lub oil filter

**Fuel System**

Type of injection system Indirect injection  
 Fuel injector Pintle nozzle  
 Fuel injection Pump Cassette type  
 Delivery/hour at 1500rev/min, Liters 63  
 Governor type Mechanical  
 ◊Mechanically governed cassette type fuel injection pump  
 ◊Split element fuel filter

**Technical Specifications**

Manufacturer	PERKINS
Model	403C-15G
Type	4 cycle, water-cooled, diesel engine
Number of cylinders	3
Cylinder arrangement	Vertical in-line
Displacement, Liters	1.496
Bore X Stroke, mm	84 X 90
Compression Ratio	22.5:1
Combustion System	Indirect injection
Aspiration	Natural aspiration
Rotation	Anti-clockwise viewed on flywheel
Gross engine power, kWb	15
Fan Power, kWm	0.2
BMEP gross, bar	7.22
Combustion air flow, m <sup>3</sup> / min	1.08
Exhaust gas temp.(after turbo), °C	490
Exhaust gas flow (after turbo),m <sup>3</sup> / min	2.88
Mean piston speed, m / s	4.5

**Electrical System**

Alternator 12 Volt, 55 Amp  
 Starter motor (DC) 12 Volt  
 Starter motor power 2 kW  
 ◊Oil pressure and coolant temperature switches  
 ◊12 volt shut off solenoid energised to run  
 ◊Glow plug cold start aid and heater/starter switch

**Fuel Consumption**

liters per hour	%110 Load	4.1 L
	%100 Load	3.7 L
	%75 Load	2.8 L
	%50 Load	2.1 L
grams per kWh	%110 Load	258 g/kWh
	%100 Load	254 g/kWh
	%75 Load	258 g/kWh
	%50 Load	291 g/kWh

**Cooling System**

Type Tropical, heavy duty type  
 Ambient temperature, °C 50  
 Engine+Radiator coolant cap., Liters 6  
 Estimated cooling airflow reserve, kPa 0.125  
 ◊Thermostatically-controlled system with belt driven circulating pump and pusher fan  
 ◊Mounted radiator piping and guards

## Newage/Stamford BCI164C Alternator

### Standard Features

#### Winding&Electrical Performance

All generator stators are wound to 2/3 pitch. This eliminates triplen (3rd, 9th, 15th...) harmonics on the voltage waveform and is found to be the optimum design for trouble-free supply of non-linear loads. The 2/3 pitch design avoids excessive neutral currents sometimes seen with higher winding pitches, when in parallel with the mains. A fully connected damper winding reduces oscillations during paralleling. This winding, with the 2/3 pitch and carefully selected pole and tooth designs, ensures very low waveform distortion.

#### SX460 AVR

With this self excited control system the main stator supplies power via the Automatic Voltage Regulator (AVR) to the exciter stator. The high efficiency semiconductors of the AVR ensure positive build-up from initial low levels of residual voltage.

This exciter rotor output is fed to the main rotor through a three phase full wave bridge rectifier. This rectifier is protected by a surge suppressor against surges caused, for example, by short circuit.

#### Terminals&Terminal Box

Standard generators are 3-phase reconnectable with 12 ends brought out to the terminals, which are mounted on a cover at the non-drive end of the generator. A sheet steel terminal box contains the AVR and provides ample space for the customer's wiring and gland arrangements. It has removable panels for easy access.

#### Shaft&Keys

All generator rotors are dynamically balanced to better than BS6861:Part 1 Grade 2.5 for minimum vibration in operation. Two bearing generators are balanced with a half key.

#### Insulation / Impregnation

The insulation system is class 'H'

All wound components are impregnated with materials and processes designed specifically to provide the high build required for static windings and the high mechanical strength required for rotating components.

#### Standards

Newage Stamford industrial generators meet the requirements of **BS EN 60034** and the relevant section of other international standards such as **BS5000, VDE0530, NEMA MG1-32, IEC34, CSA C22.2-100, AS1359**. Other standards and certifications can be considered on request.

#### Quality Assurance

Generators are manufactured using production procedures having a quality assurance level to BS EN ISO 9001.

### Technical Specifications

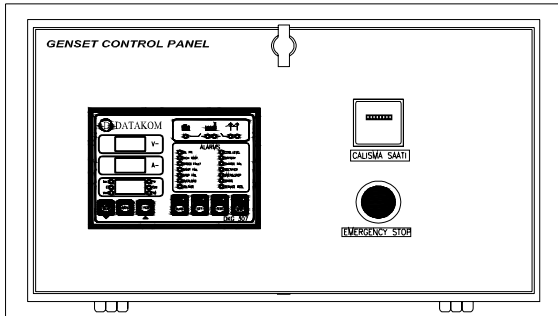

Manufacturer	NEWAGE / STAMFORD
Model	BCI164C
Type	4-Poles, Rotating Field, Brushless
Standby power at rated voltage, kVA	15
Efficiency, %	80
Power factor	0.8
Phase	3
Frequency, Hz	50
Speed, Rpm	1500
Voltage, V	400
Excitation	Self excited
Stator windings	2/3 Pitch factor
Regulation	AVR, Automatic Voltage Regulator
Voltage Regulator	SX460
Voltage Regulation, %	± 1.5
R.F.I Suppression	BS EN 61000-6-2 & BS EN 61000-6-4 VDE0875G, VDE 0875N
Waveform distortion	No Load <1.5% Non distorting balanced linear load <5.0%
Rotor	Dynamic balanced
Overspeed, Rpm	2250
Short circuit current	< 300%
TIF	Less than 50
Insulation class	H
Construction	Single bearing, direct coupled
Coupling	Flexible
Stator winding	Double layer concentric
Connection	WYE
Protection class	IP23
Cooling air volume, m <sup>3</sup> / sec	0.071

### Optional Equipment

- ◊ Upgrade to SA465 AVR with improved regulation 0.5%
- ◊ Quadrature Droop kit for Parallel Operation
- ◊ Anti Condensation Heaters

**Control Panel**

**Standard Equipments**

- ◊Datakom DKG307 digital automatic control module
- ◊Hourmeter
- ◊Emergency stop button

**Datakom DKG307 Control Module**

**Description**

- ◊The DKG-307 is a comprehensive AMF unit for a single generating set operating in standby mode.
- ◊In AUTOMATIC position, DKG-307 monitors mains phase voltages and controls the automatic starting, stopping and load transfer of the generating set in case of a mains failure and once the generator is running, it monitors internal protections and external fault inputs. If a fault condition occurs, the unit shuts down the engine automatically and indicates the failure source with the corresponding red led lamp.
- ◊The DKG-307 provides a comprehensive set of digitally adjustable timers, threshold levels, input and output configurations and operating sequences. The unauthorized access to program parameters is prevented by the program lock input. All programs may be modified via front panel pushbuttons, and do not require an external unit.
- ◊The fault conditions are considered in 2 categories as Warnings and Alarms. Measured values have separate programmable limits for warning and alarm conditions.
- ◊The service request indicator lamp turns on at the expiration of either engine hours or time limits.
- ◊It is possible to monitor the operation of the system locally or remotely with the WINDOWS based PC utility program.
- ◊The unit is designed for front panel mounting. It is fitted into the cut-out with the steel spring removed. Connections are made with 2 part plug and socket connectors.

**Pushbutton Controls**

STOP / START  
 AUTO, TEST, MANUAL  
 LCD PAGE

**Features**

- Automatic mains failure with genset control and protection
- Remote Start operation capability
- Analogue temperature and oil pressure inputs
- Genset KW and Power Factor measurement
- Engine hours run counter
- Periodic maintenance request display
- 165 programmable parameters
- Battery backed-up real time clock
- Weekly operation schedule programs
- Daily, weekly, monthly exerciser
- Event logging with time stamp
- Statistical counters
- Serial RS-232 data output for telemetry on PC
- Free MS-Windows remote monitoring SW
- Configurable analogue inputs: 2
- Configurable digital inputs: 7
- Configurable relay outputs: 2
- Output expansion capability
- Small dimensions (155x115x48mm)

**Input Functions display on LCD**

Generator Volts	Volts L1-N, L2-N, L3-N
Generator Volts	Volts L1-L2, L2-L3, L3-L1
Generator Amps	Amps L1, L2, L3
Generator Frequency	Hz
Mains Volts	Volts L1-N, L2-N, L3-N
Mains Volts	Volts L1-L2, L2-L3, L3-L1
Mains Frequency	Hz
Engine Speed	RPM
Plant Battery Volts	Volts
Engine Hours Run	Hour
Generator total power	kVA L1, L2, L3, total
Generator total power	kW L1, L2, L3, total
Generator power factor	Cosφ L1, L2, L3, total

**Optional Input Functions**

Engine Oil pressure	kPa
Fuel level	%
Engine Temperature	°C

**Alarm Channels**

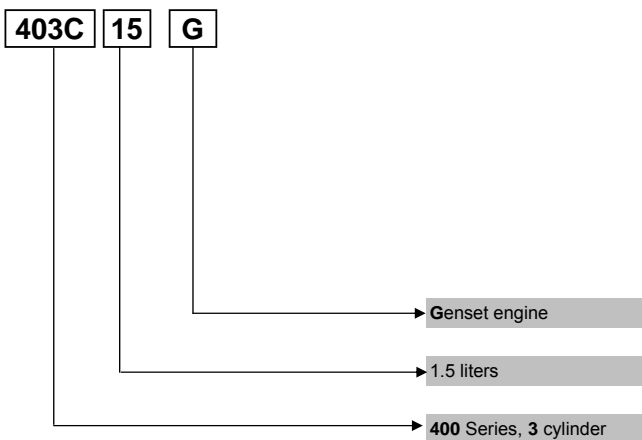

- Under/over generator voltage
- Over-current
- Under/over generator frequency
- Under/over speed
- Charge fail
- Emergency stop
- Low oil pressure
- High engine temperature
- Fail to start
- Low/high DC battery voltage
- Reverse power
- Generator phase rotation error
- Generator short-circuit protection
- Loss of speed sensing signal
- Mains out of limits

**Model Codes and General Information**

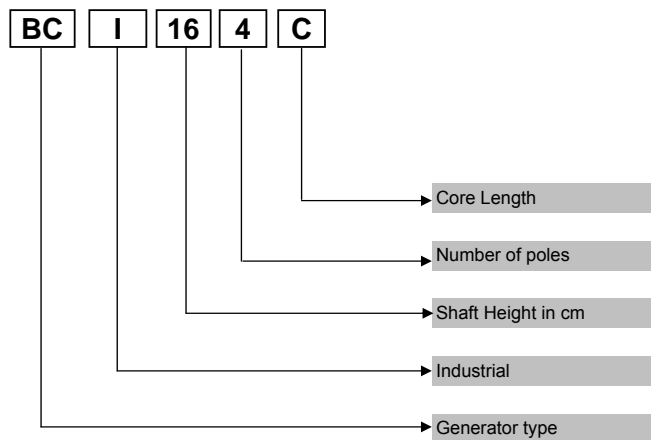

Cukurova Diesel Generator

Perkins 400 Series Diesel Engine

Newage / Stamford Alternator

**Information**

Power Ratings

**Standby power rating** is for the supply of emergency power at variable load for the duration of the non-availability of the mains power supply. No overload capacity is available at this rating. A standby rated engine should be sized for an average load factor of 80% based on published standby rating for 500 operating hours per year. Standby ratings should never be applied except in true emergency power failure conditions.

**Prime power rating** is available for unlimited hours per year with a variable load of which the average engine load factor is 80% of the published power rating, incorporation of a 10% overload for 1 hour in every 12 hours of operation which permitted

**Continuous power rating** is available for continuous full load operation. No overload is permitted.

Acc. to ISO 3046/1, BS 5514, DIN6271

Electric Formulas

Values	Formula	
kWe	kWm X E	
kWe	$(U \times I \times 1.73 \times pf) / 1000$	kVA x pf
kVA	$(U \times I \times 1.73) / 1000$	kWe / pf
I (Amp)	$(kWe \times 1000) / (U \times 1.73 \times pf)$	$(kVA \times 1000) / (U \times 1.73)$
Frequency	$(Rpm \times N^{\circ}Pole) / (2 \times 60)$	
Rpm	$(2 \times 60 \times Frequency) / N^{\circ}Pole$	

- kWm: Mechanical Power
- kWe : Electrical Power
- pf : Power factor
- E : Alternator efficiency
- I : Current (A)
- U : Voltage (V)
- kVA : Power
- Rpm: Revolutions per minute

**General Dimensions**

Standard Generator

<b>Length, L</b>	1,3 m
<b>Height, H</b>	1,2 m
<b>Width, W</b>	0,6 m
<b>Weight, Total</b>	550 kg

Generator with Soundproof Canopy

<b>Length, L</b>	1,5 m
<b>Height, H</b>	1,25 m
<b>Width, W</b>	0,8 m
<b>Weight, Total</b>	700 kg

**Generator Room Layout**

Above drawings dimensions and weights are only for guidance. For installation design of your specific application, necessary certified drawings, at site consultancy service as well as maintenance and installations manuals will be provided by Cukurova without any charge.
